Weightage

Grade in Each Subject is awarded based on performance in Continuous Internal Assessment as well as End Semester Examination.

Computation of SGPA and CGPA

The following formula shall be used for calculating the Semester Grade Point Average (SGPA) and cumulative Grade Point Average (CGPA):

- (a) The SGPA is the ratio of sum of the product of the number of credits with the grade points scored by a student in the subject taken by a student and the sum of the number of credits of all the subject undergone by a student, i.e.

$$SGPA (S_i) = \sum (C_i \times G_i) / \sum C_i$$

Where C_i is the number of credits of the i th course and G_i is the grade point scored by the student in the i th subject.

- (b) The CGPA is also calculated in the same manner taking into account all the subject undergone by a student over all the semesters of a programme, i.e.

$$CGPA = \sum (C_i \times S_i) / \sum C_i$$

where S_i is the SGPA of the semester and C_i is the total number of credits in the semester.

- (c) The SGPA and CGPA shall be rounded off to 2 decimal points and reported in the transcripts.

Regulation for Passing

$CGPA < 6$ and $5 \geq$ will be Second Class

$CGPA \geq 6$ and < 8 will be First Class

$CGPA \geq 8$ will be First Class with distinction

$CGPA < 5$ will be equivalent to fail

Equivalence of CGPA in the Percentage

$CGPA \times 10$ will be equal to Percentage of Marks Secured.
